## PLANT PHYSIOLOGY AND BIOCHEMISTRY—GENERAL

QH345.A1P73

**A fast-decompression method of disintegrating microbial cell walls [Yeast, Saccharomyces, bacteria Mycobacterium, Algae Chlorella].** Rakitin, V YU; Monosov, E Z; Prokof'eva, N V; Grigoryan, A N *Appl Biochem Microbiol* 12 (2): 224-228. Ref. Mar-/Apr 1976 (Transl. 1977)

QH345.A1P73

**A micromethod for the determination of cellulase activity [from the fungus Trichoderma lignorum].** Lobanok, A G; Romanov, S L *Appl Biochem Microbiol* 12 (3): 368-370. Ref. May/June 1976 (Transl 1977)

QH345.A1P73

**Activation of L-amino acids by a preparation of aminoacyl-tRNA synthetases from the yeast Candida utilis IBFM-405.** Vinogradov, B D; Chigaleichik, A G; Shul'ga, A V; Rylkin, S S *Appl Biochem Microbiol* 11 (3): 342-345. Ref. May/June 1975 (Transl 1976)

QH345.A1P73

**Activity of certain dehydrogenases of accumulating and continuous-flow cultures of paraffin-oxidizing yeasts of the genus Candida [guilliermondii].** Khokhlenko, A F; Konovalov, S A *Appl Biochem Microbiol* 11 (5): 569-571. Sept/Oct 1975 (Trans 1976)

QH345.A1P73

**Biochemical composition of several blue-green algae and Chlorella.** Trubachev, N I; Gitel'zon, I I; Kalacheva, G S; Baravshiv, V A; Belyanin, V N; Andreeva, R I *Appl Biochem Microbiol* 12 (2): 155-161. Ref. Mar-/Apr 1976 (Transl. 1977)

QH345.A1P73

**Biosynthesis of cytidine-5'-di- and triphosphates by the yeast Saccharomyces cerevisiae and the algae Enteromorpha and Cladophora.** Ansberga, S E; Irgen, A M; Ludrika, R A *Appl Biochem Microbiol* 12 (2): 195-197. Ref. Mar/Apr 1976 (Transl. 1977)

QH345.A1P73

**Biosynthesis of cellulase by Geotrichum candidum [Fungi].** Kudryashova, T I; Feniksova, R V; Tiunova, N A *Appl Biochem Microbiol* 12 (3): 272-276. Ref. May/June 1976 (Transl 1977)

QH345.A1P73

**Characteristic properties of cellulase complexes produced by the fungus Trichoderma lignorum om 534 on cellulose- and lactose-containing media.** Lobanok, A G; Romanov, S L; Zinchenko, O N; Nesterenko, V N *Appl Biochem Microbiol* 12 (2): 181-185. Mar-/Apr 1976 (Transl. 1977)

QH345.A1P73

**Conditions of formation of dextranase of Pencillium funiculosum 15 [Fungi].** Petrova, L I; Molodova, G A; Burtseva, N N *Appl Biochem Microbiol* 11 (1): 54-57. Jan/Feb 1975 (Transl. 1976)

QH345.A1P73

**Cytochrome f of Chlorella pyrenoidosa Pringsheim 82T [Algae].** Mutuskin, A A; Pshenova, K V; Makovkhina, L E; Shatilov, V R; Kolesnikov, P A *Appl Biochem Microbiol* 11 (3): 380-383. Ref. May/June 1975 (Transl 1976)

QH345.A1P73

**Determination of the relative volume of lipid inclusions in the yeasts Candida guilliermondii grown on hydrocarbons.** Kazantsev, E N; Maksimova, G N; Shchekina, E V; Vorob'eva, G I *Appl Biochem Microbiol* 11 (5): 571-575. Sept/Oct 1975 (Trans 1976)

QH345.A1P73

**Determination of steroid saponins in the leaves of Dioscorea deltoidea.** Paseshnichenko, V A; Borikhina, M G; Guseva, A R *Appl Biochem Microbiol* 11 (5): 784-787. Ref. Sept/Oct 1975 (Trans 1976)

QH345.A1P73

**Effect of components of nutrient medium on biosynthesis of acid ribonuclease by culture of Penicillium brevi-compactum [Fungi].** Ezhov, V A; Minasyan, A E; Popova, YU M *Appl Biochem Microbiol* 11 (1): 10-15. Ref. Jan/Feb 1975 (Transl. 1976)

QH345.A1P73

**Effect of different sources of nitrogen on cellulase biosynthesis during the sumberged cultivation of Trichoderma viride [Fungi].** Kalunyants, K A; Feniksova, R V; Baganova, M S; Shchus, G V; Salovarova, V P *Appl Biochem Microbiol* 12 (3): 277-280. May/-June 1976 (Transl 1977)

QH345.A1P73

**Effect of naphthoquinones and saponins on catalase activity [Pittosporum glabratum, Clematis mandschurica, sunflowers].** Shcherbanovskii, L R; Blagonravova, L N; Kovaleva, I G; Burdeinaya, T A; Reva, A G *Appl Biochem Microbiol* 12 (1): 40-43. Ref. Jan/Feb 1976 (Transl 1977)

QH345.A1P73

**Effect of some divalent metal chlorides on lipase activity in the fungus Rhizopus microsporus UzLT-1.** Rizaeva, M; Davranov, K *Appl Biochem Microbiol* 12 (3): 307-308. Ref. May/June 1976 (Transl 1977)

QH345.A1P73

**Effect of the composition of the nutrient medium on the biosynthesis of beta-fructofuranosidase by the fungus Aspergillus awamori 16.** Dobrolinskaya, G M; Serova, YU Z *Appl Biochem Microbiol* 12 (3): 298-303. May/June 1976 (Transl 1977)

QH345.A1P73

**Ergosterol synthesis by yeasts of the genus Candida.** Dikansyaka, E M; Robysheva, Z N *Appl Biochem Microbiol* 11 (1): 16-19. Ref. Jan/Feb 1975 (Transl. 1976)

QH345.A1P73

**Fractionation of "tricholysin," a preparation of fibrinolytic enzymes produced by Trichothecium roseum LK. ex Fr. [Fungi] on carboxymethyl-Sephadex C-50.** Stepanova, TS N; Maksimova, R A; Yulikova, E P; Silaev, A B; Andreenko, G V; Serebryakova, T N *Appl Biochem Microbiol* 12 (3): 325-328. May/June 1976 (Transl 1977)

QH345.A1P73

**Influence of cyclic compounds on the pigment content in cultures of Aspergillus niger [Fungi].** Malama, A A; Smirnova, L A *Appl Biochem Microbiol* 11 (1): 49-53. Ref. Jan/-Feb 1975 (Transl. 1976)

QH345.A1P73

**Influence of the chemical nature of the carbon source in the medium on the composition of the biomass [Yeasts, Candida tropicalis, Candida utilis, Trichosporon cutaneum].** Osovik, A N; Gridina, L E; Gumenyuk, G D; Burtsev, V YA; Lavrova, I P; Osovik, E M *Appl Biochem Microbiol* 11 (5): 575-578. Ref. Sept/Oct 1975 (Trans 1976)

QH345.A1P73

**Influence of the concentrations of individual components of the nutrient medium on the production of pectolytic and cellulolytic enzymes by microscopic fungi [Sclerotinia sclerotiorum, Trichoderma lignorum].** Snigireva, S G; Pavlovskaya, Zh I; Lobanok, A G; Astapovich, N I *Appl Biochem Microbiol* 12 (3): 380-383. May/June 1976 (Transl 1977)

QH345.A1P73

**Isolation of lipase from Nigella damascena L. Seeds.** Korchagina, L N; Rudyuk, V F *Appl Biochem Microbiol* 11 (39): 397-399. Ref. May/June 1975 (Transl 1976)

QH345.A1P73

**Peptidases of preparations of proteolytic enzymes of certain species of bacteria, mold fungi, and actinomycetes.** Lysenkov, N V *Appl Biochem Microbiol* 12 (1): 16-20. Ref. Jan/Feb 1976 (Transl 1977)

QH345.A1P73

**Preparative isolation of terrilytine [a fibrinolytic enzyme from Aspergillus terricola] components and study of their enzymatic properties [Fungi].** Selezneva, A A; Babenko, G A; Bol'shakova, M D; Rozhanskaya, T I; Margolina, N A *Appl Biochem Microbiol* 12 (3): 332-335. Ref. May/June 1976 (Transl 1977)

QH345.A1P73

**Preparative microbiological synthesis of P32 [phosphorus isotope]-nucleoside triphosphates from 5'-mononucleotides [Yeast, Saccharomyces cerevisiae].** Shabalin, YU A; Tsiomenko, A B; Vagabov, V M; Kulaev, I S *Appl Biochem Microbiol* 12 (3): 303-306. May/June 1976 (Transl 1977)

QH345.A1P73

**Requirements of growth factors of yeasts [Candida boidinii, Zygowillia pini, Torulopsis molischiana] growing on methanol.** Blagodatskaya, V M; Erofeeva, Z S; Eroshin, V K *Appl Biochem Microbiol* 12 (3): 289-292. Ref. May/June 1976 (Transl 1977)

QH345.A1P73

**Role of proteases and beta-glucanases in the lysis of yeast cell walls [Candida guilliermondii].** Maksimova, G N; Mosin, V A; Marksimov, V I; Vorob'eva, G I *Appl Biochem Microbiol* 12 (3): 263-268. Ref. May/-June 1976 (Transl 1977)

QH345.A1P73

**Selection of alkaloid-producing fungi by the method of thinlayer chromatography [Penicillium].** Bekmakhanova, N E; Kozlovskii, A G; Bezborodov, A M *Appl Biochem Microbiol* 11 (1): 116-120. Ref. Jan/Feb 1975 (Transl. 1976)

QH345.A1P73

**Simple method for detecting uronic acid residues in preparations of Eremurus [regelii] glucomannans and their origin.** Kuznetsov, A A; Stepanenko, B N; Afanas'eva, E M *Appl Biochem Microbiol* 12 (2): 219-224. Ref. Mar/Apr 1976 (Transl. 1977)

QH345.A1P73

**Specificity of splitting and synthesis of dinucleoside monophosphates by Aspergillus clavatus RNase C2 [Fungi].** Bezborodova, S I; Gulyaeva, V I; Morozova, V G *Appl Biochem Microbiol* 11 (1): 5-9. Ref. Jan/Feb 1975 (Transl. 1976)

QH345.A1P73

**The role of acetate in the biosynthesis of anabasine in Anabasis aphylla.** Nurimov, E; Lovkova, M YA; Il'in, G S *Appl Biochem Microbiol* 11 (1): 134-135. Jan/Feb 1975 (Transl. 1976)

QH345.A1P73

**Transformation of kinetine [biological plant-growth regulators] by certain microorganisms.** Mishke, I V; Vitol, M YA; Pevzner, D I; Lishman, A YA *Appl Biochem Microbiol* 12 (3): 364-368. Ref. May/June 1976 (Transl 1977)

QH345.A1P73

**Use of beta-propiolactone for "cold sterilization" of organomineral nutrient media, used for the culturing of Chlorella [Algae].** Kostlan, N V; Danilyak, N I; Titova, A M *Appl Biochem Microbiol* 12 (3): 371-373. May/-June 1976 (Transl 1977)

The *Bibliography of Agriculture* is a monthly index to the literature of agriculture and the allied sciences received in the National Agricultural Library. Magnetic tapes supplied by the library are computer processed, using several vocabulary control mechanisms. The resulting indexes provide access to the literature in considerably less time than would be required by traditional indexing techniques.

# INTRODUCTION

The *Bibliography of Agriculture* is a monthly index to the literature of agriculture and allied sciences, based upon the indexing records prepared by the U.S. National Agricultural Library, for its CAIN (Cataloging and Indexing) computer system. The Oryx Press, in cooperation with Datagraphics Press, Inc., prepares and publishes the Bibliography under the control of its own computer indexing system.

## CONTENT

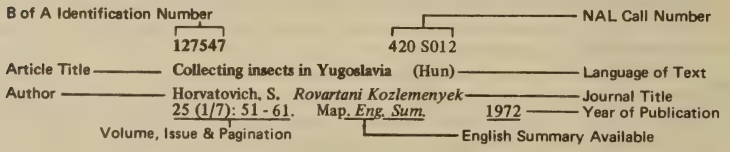
The National Agricultural Library collects literature related to agriculture from world wide sources. The Bibliography includes journal articles, pamphlets, government documents, special reports, proceedings, etc. Books, new serials and other materials recently cataloged by the Library are announced in the *National Agricultural Library Catalog* published by Rowman and Littlefield. Material covered by both the Bibliography and the Catalog is also available through computerized, on-line interactive systems offered by System Development Corporation and Lockheed Information Systems.

Publications are considered for indexing in the CAIN System if a summary, abstract or title is available in a language in which the Library has expertise. Articles of substantial interest to the agricultural community are selected by specialists on the library staff. Editorials, letters to the editor, regular columns, and articles signed with pseudonyms or initials are not included. Indexing of articles on the processing of agricultural products is limited to those on primary processing. Generally material must have been published in the current year or the preceding year, but exceptions are made for comprehensive volumes or works of special significance to a wide audience. Articles that would not otherwise be indexed in the *Bibliography of Agriculture* might be included for USDA authored, sponsored, or published materials.

The Bibliography is now divided into ten sections: A main entry section, five main entry sub-sections, a geographic index, a corporate author index, a personal author index, and a subject index. In addition, a list of Journal Titles indexed in this issue is included in the front matter.

## MAIN ENTRY SECTION

The main entry section provides full bibliographic data for the records added to the CAIN system during the preceding month by the National Agricultural Library.



Entries are assigned to one (or more if appropriate) of the broad subject categories shown in the table of contents. The array of subject categories was increased in 1973 to facilitate browsing through a small number of citations of high relevance to a particular interest. Approximately equal numbers of citations will fall into each category over a given period of time. In assigning materials to the categories, first consideration is given to the aspect, discipline or methodology involved, so that the categories will enhance information given in the title.

Within each category, entries are arranged alphabetically by journal title abbreviation. This permits rapid locating and scanning of articles from journals which are known to be relevant.

Each entry begins with a six digit identification number assigned sequentially throughout a volume year. This number serves as an identfier for the item in the various indexes. The call number of the National Agricultural Library is also noted on the first line of each entry, and should be included in any correspondence with the library. All titles are in English, using the Library's translations of non-English titles as necessary. If the text is other than English, the original language is indicated in parentheses following the title, using the following notations:

| | | | | | |
|---|---|---|---|---|---|
| (Afr) | Afrikaans | (Geo) | Georgian | (Pol) | Polish |

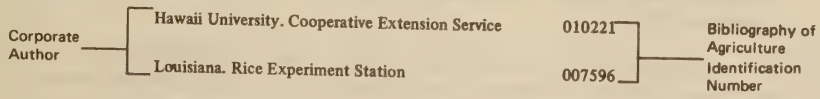
In order to identify bibliographic elements within each main entry, note the following:

## MAIN ENTRY SUB-SECTIONS



Since The Oryx Press became publisher of the *Bibliography of Agriculture* (in January 1975), five main entry sub-sections have been added. These sections follow The Main Entry Section and appear in the following order: USDA Publications (authored by, sponsored by, and published by); State Agricultural Experiment Station Publications; State Agricultural Extension Service Publications; FAO Publications; and Translated Publications. Each of these five sections appeared in the original *Bibliography of Agriculture* published by the U.S. Department of Agriculture prior to 1970. The citation format used in these five sections differs from The Main Entry Section only in the elimination of the *Bibliography of Agriculture* Identification Number. These numbers have been dropped in these sections because all the entries are in The Main Entry Section as well as in the sub-sections.

## GEOGRAPHIC INDEX

As part of our goal of constantly increasing access to the literature, we have added a geographic index. This index is a direct alphabetic listing of all place names which have been indexed in association with the title. Obviously not all titles will have geographic entries. The indexing division of the National Agricultural Library will add geographic descriptors wherever it is germane to the subject of the article.

## CORPORATE AUTHOR INDEX

Readers will note that the corporate author index is considerably enlarged. We are now able to indicate authorship of the publications of the State Agricultural Experiment Stations and Extension Services. The full corporate citation is given, followed by the six digit identification number referring to its appropriate main entry.

## AUTHOR INDEX

All personal authors (to a maximum of ten for each citation) are included in the index. Entries are made by last name and initials, followed by the six digit identification number referring to the bibliographic data in the main entry section.

## SUBJECT INDEX

The vocabulary of the *Bibliography of Agriculture* is derived from the indexed literature. As a result, it reflects both natural language and scientific terminology. The reader must keep this fact in mind and approach the subject index without any preconceived taxonomy in mind. For example, data on a particular member of the ACARIDAE family may be found under TICKS as well. Prevention measures will be found under ACARICIDE.

The reader should plan his search in terms of the most specific natural language term prior to searching under a scientific term. However, note that the vocabulary is an open ended one and new terms are added each month. Undoubtedly readers will be more keenly aware of crucial search terms within their own fields of research. If such terms are missing, we hope readers will notify the editor of such gaps. The Subject Index will increase its utility if there is frequent interaction between the research community and the editor.

All entries are complete (none are truncated), and are based on single words in the title (and title enrichment when added by the library). An entry will be made whenever a title word matches a word on the authority file, which currently contains over 25,000 terms. The file is organized so that in most cases synonymous terms are grouped together under a single subject heading. Thus singular and plural forms are grouped under a single term as are grammatical variants.

The title word on which the entry is based, appears in italics to facilitate rapid scanning of the index. A secondary word, which may either precede or follow the primary word, appears in bold face type. The alphabetic sequence is by the secondary (bold face) word. These word pairs help provide finer access to desired terms, particularly under headings which have many entries.

**CHEESES**
Production and sale of *Gorgonzola* **cheese** [Prices, trade, productive capacity]. 227693
The **cheese** *industry*. 227819
Information for the consumer and advertising abroad of typical *Italian* **cheeses** [Prices]. 227689
Not enough to produce—Sale of *Italian* **cheeses** urgency of modern forms and efficient structures [Prices, trade].

Many general terms were deleted from the control vocabulary in 1975, and work is underway on the establishment of a more complete list of specific terms. Each subsequent issue will reflect this work. The *Thesaurus of Agricultural Terms*, published in 1976, reflects all the changes made in the control vocabulary through December 1975.

The last item of each entry in the Subject Index is the six digit *Bibliography of Agriculture* identification number. Use this number to locate the complete main entry citation in the monthly issues.

## AVAILABILITY OF REFERENCES CITED

Most of the current publications of the Department of Agriculture, and publications issued by the State Experiment Stations and the State Agricultural Extension Services, may be obtained free of charge by applying directly to the issuing agency. The National Agricultural Library does not distribute them, nor does the publisher.

Users who wish to obtain full text for citations should first utilize the resources of their local libraries. For material which is not readily available from other sources, users may request material from the National Agricultural Library. Such requests must include the complete citation as well as the Library's call number. Microfilm or electrostatic copies of documents may be purchased from the Photocopying Service of the National Agricultural Library, U.S. Department of Agriculture, Beltsville, Maryland 20705. Copy charges are:

| | |
|---|---|
| Microfilms: | $1.00 for each 30 pages or fraction copied from a single article or book |
| Electrostatic Copies: | $1.00 for each 10 pages or fraction copied from a single article or book. |

Payment must accompany the order. Cash, library coupons, check, or money order drawn to the National Agricultural Library, USDA, are acceptable. Payment for orders originating outside the United States should be made by international money order or draft on an American bank, or by UNESCO book coupons. Library coupons, valued at $1.00 each, may be purchased in any quantity from the Library's Photocopying Service.
